Interactive Webinars: On-Demand Webinars

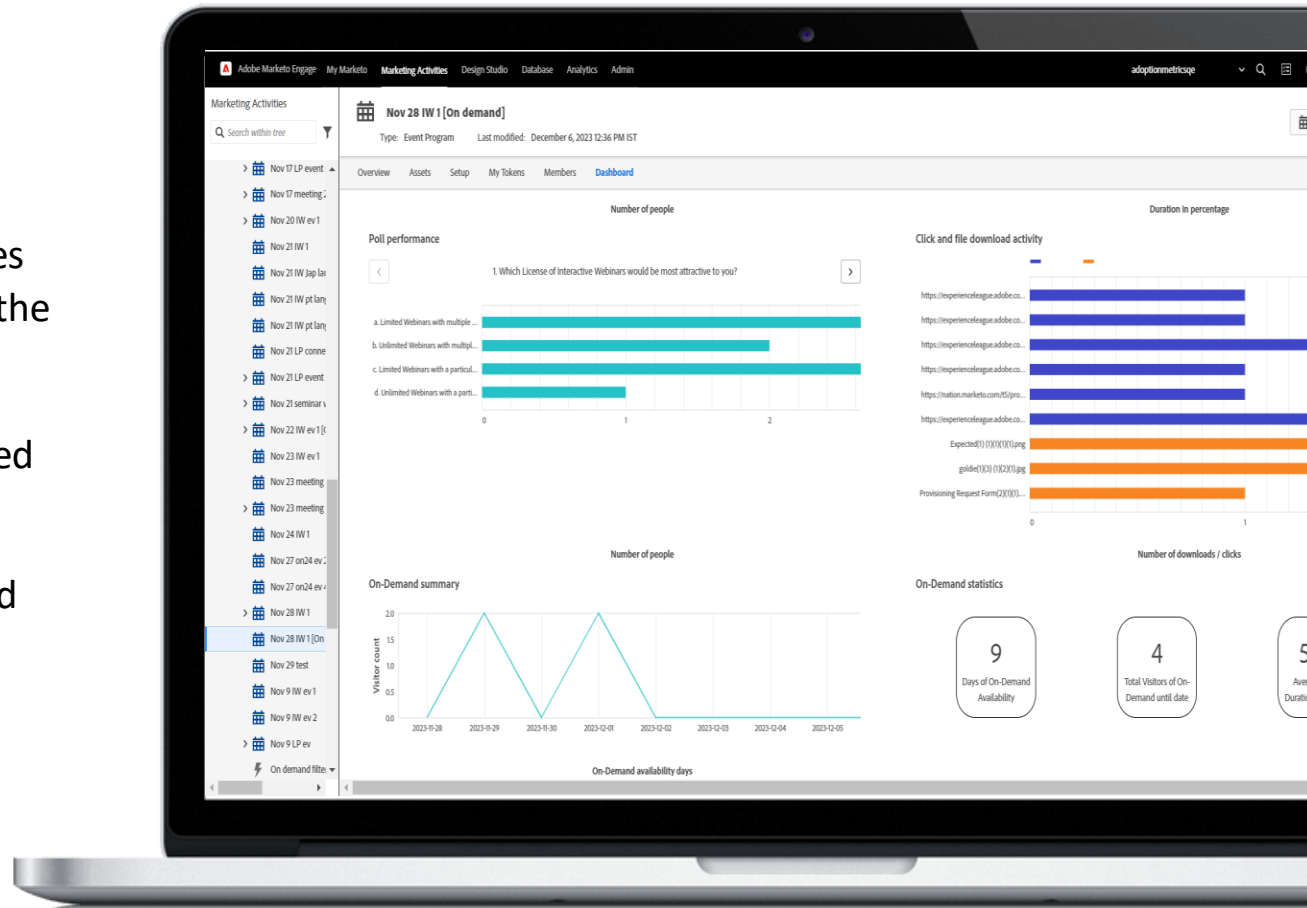

Target interested leads that missed the webinar but are potential converts that marketers can engage with based on interaction with webinar recordings.

Share Webinar Recordings with interested leads that couldn't attend the webinar but are potential targets

- Share the original webinar URL with all the non-attendees to be able to view the recording. Recording available at the same link.
- Track their first visit and watch duration and take targeted actions through smart lists for enhanced nurturing.
- Obtain aggregated summary and statistics on on-demand performance with daily visit view and average watch duration.

Interactive Webinars: On-Demand Webinars

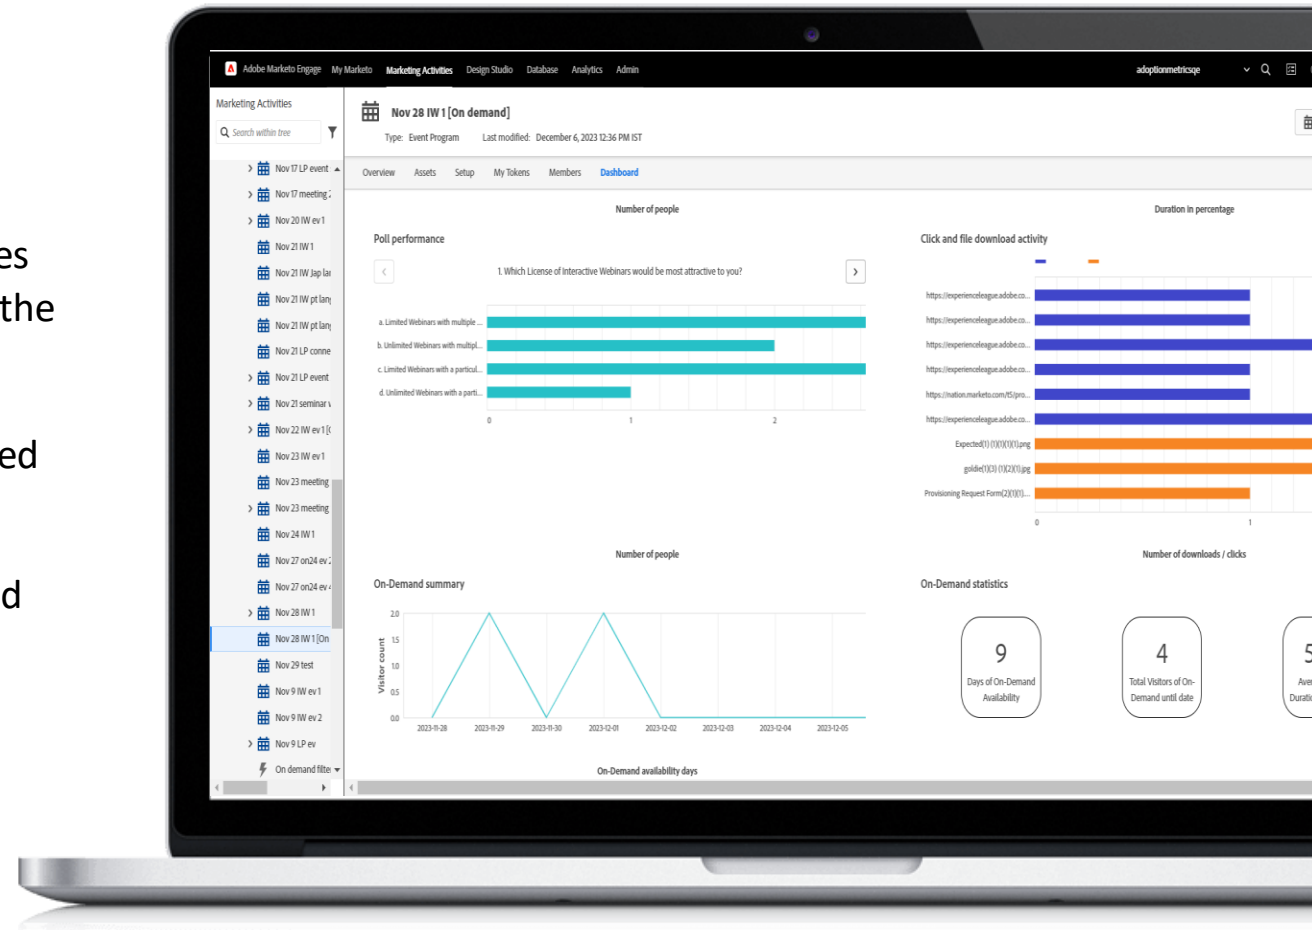

Interactive Webinars

Marketo Engage: Email Bot Activity Filtering

Identify and filter out fake email engagement that is being generated by bots

- Identify, flag or filter email activities that happen between a specific duration
- Set your own duration between 0 seconds (happening exactly at the same second) to 3 seconds
- By default value will be set to 0 seconds i.e activities happening exactly at the same second

Identifying and filtering bot activity

Dynamic Chat

Senior Product Manager

Conversational Flows in Landing Pages

Embed Dynamic Chat Conversational Flows directly into Marketo Engage Landing Pages

More Dynamic Chat experiences outside the chatbot

- Support for Conversational Flow module in Freeform and Guided Landing Page Templates and Editors
- Embed Conversational Flows directly into Landing Pages to making meeting booking pages, track embedded PDFs, collect information from leads, and more!

Compute Formula Flow
Step Service

Kenneth Elkington
Senior Product Manager

Overview and Prerequisites

Compute Formula Flow Step Service Overview

Flow Step Service
for Marketo
Engage

Built for use on
Adobe IO Runtime

Computes Excel-style
Formulas and Writes
Results Back to
Person Records

- Next Anniversary:
EDATE("{{lead.Date of
Birth}}",
(DATEDIF("{{lead.Date
of Birth}}",
"{{system.date}}")+1)
* 12)

Works in Batch,
Trigger, and
Executable
Campaigns

This is an Open-
Source, Community-
Supported
Application. Marketo
Support Can Only
Assist in
Troubleshooting
Marketo-Side
Functionality

Prerequisites

A Marketo Engage Subscription
and Admin Permissions

An Adobe IO Runtime Account
and Developer Console Access

- IO Runtime is not packaged with Marketo Engage. Reach out to your account manager if you need more information.

You or your team will need
experience using a Command
Line, (Bash, Powershell...etc.)

Experience using git and GitHub

Have NodeJS, Node Package
Manager (NPM), and the Adobe
IO Command Line Application

More information in the User
Guide on nation.marketo.com

Compute Flow Support

Compute Flow is an open-source application built Self-Service Flow Steps and Adobe I/O Runtime

SSFS Framework is fully supported by Adobe

Compute Flow is Community Support Only

Deployment

Installation

Usage

Formulas

Composite Score

```
ROUND( SUM (PRODUCT ({{lead.Behavior Score}}, 0.3) , {{lead.Demographic Score}}) , 0 )
```

Time in Stage

```
DAYS( "{{lead.SQL Date}}" , "{{lead.MQL Date}}" )
```

All FormulaJS Functions are Supported

- Lookup and Column-Based Functions are Not Supported
- Do Not Use a Leading Equals Sign (=) in Your Formulas
- Numbers between -1 and 1 should include a leading zero, e.g. 0.3
- Strings and String-like Fields should be surrounded by quotation marks (“”).

Demo: Composite Score

Composite Score Formula

Behavior Score: **30%**

- Coefficient: 0.3

Demographic Score: **100%**

- Coefficient: 1 (Omitted)

ROUND() to an integer for our score field

ROUND(SUM (PRODUCT
({{lead.Behavior Score}}, 0.3) ,
{{lead.Demographic Score}}) , 0)

Demo: Time In Stage

Time In Stage Formula

DAYS() function calculates the difference in days between the end date and the beginning date

SQL Date is the ending date for “Time in MQL” and MQL Date is the Beginning

Remember to wrap your tokens with quotation marks

```
DAYS( "{{lead.SQL Date}}" , "{{lead.MQL Date}}" )
```
